A Comment and Suggestion From A Reader

Once again our national Independence Day, July 4, is about to be celebrated with the usual holiday plans being made by most residents of Washington C. H. and Fayette County.

There will be some thoughtful moments given by some people to the significance of this occasion, but as always, the actual observance which will be given by most people will be in the nature of entertainment attraction, visiting and perhaps

In this connection we received a letter from a reader recently which called attention to the little public attention given on and should have been fittingly observed to Flag Day. Take milk, for instance- or, rather, don't take it. Now I've preached the values of milk for ages; you're probably bored with the subject. I've pointed out why you need at least a pint a day.

This rule still applies even though you're on a vacation. However - and here's the difference-when driving for long hours at a time, take your milk quota in cooked foods, with cereals or just before going to bed.

Milk, you see, is sooth in g. It actually induces sleep. When you've got a lot of driving to do. you'll want to stay awake. Both tea and coffee will be helpful in this respect.

A Comment and Suggestion From A Reader

Once again our national Independence Day, July 4, is about to be celebrated with the usual holiday plans being made by most residents of Washington C. H. and Fayette County.

There will be some thoughtful moments given by some people to the significance of this occasion, but as always, the actual observance which will be given by most people will be in the nature of entertainment attraction, visiting and perhaps

In this connection we received a letter from a reader recently which called attention to the little public attention given on and should have been fittingly observed to Flag Day. It made the suggestion and & urged that residents of this city and county who failed to display flags on June 14, could at least display the Stars and Stripes

For the worthy suggestion made by this individual, we are herewith printing the letter as we received it:

"I noticed on Flag Day that the flag I displayed was the only one I could see looking in all directions from my front

Now, reversing what it said in January, this country proposes stopping nuclear tests first — but with an inspection system — provided the Russians agree that sometime later there will be an end to weapons production. This too would require inspectors.

But Secretary of State Dulles a week ago made it clear that che agreement depends on another. And where that leads no one knows. The full American position hasn't been laid out yet. Nor has the full Russian position.
